3 Make Connections

Install your Network Camera in Ethernet network
2.Use Ethernet cable to make connection from Ethernet 10/100 RJ45 socket to the hub.

∗Use Category 5 Cross Cable when Network Camera is directly connected to PC.

Ⓐ **Note the serial number from the label on the unit.**
This serial number is same as Ethernet address,
for example: 0002D1100052=00-02-D1-00-00-12

B Assign IP address

Using Installer program

1. Run the "Installation Wizard 2" under the Software Utility directory from software CD.

2. The program will do some analysis of your network environment, after your network was analyzed, please click on the "Next" button to continue the program.

3. The program will search the Vivotek Video Receivers, Video Servers or Network Cameras on the same LAN.

4. After searching, the main installer window will pop up. Click on the MAC that matches the one you just noted from the product label of your device to connect the Internet Explorer to the Video Server.

The Internet Explorer Connects to the Network Camera

For further setup, please check the user's manual on the software CD.

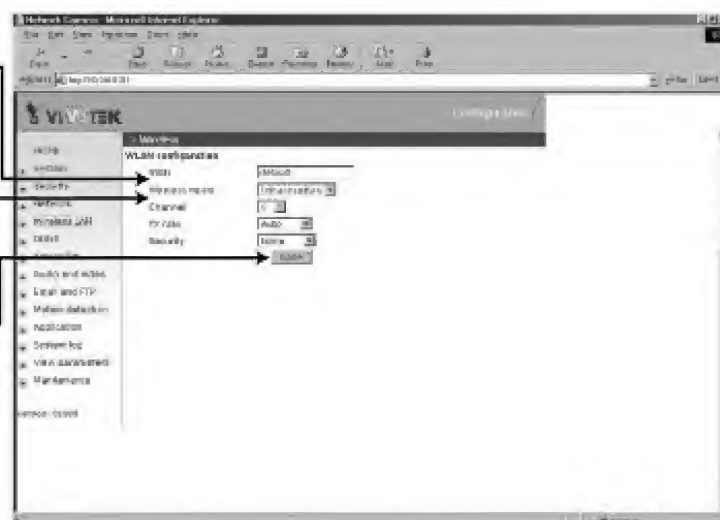
6 Set up Your Wireless Configuration for the Network Camera

1.Check the SSID currently set on your wireless access point (AP).

2.Go to IP7139's Configuration > Wireless LAN

3.Type in the SSID consistent with the setting on your AP.

4.Select the Wireless mode as "Infrastructure".

5. Click Save


Note:

1.SSID abbreviated from Service Set Identifier is the name assigned to the wireless network. The IP7139's factory SSID setting is set to "default".
2.Select "Ad-Hoc" wireless mode if you want the IP7139 to communicate without using an AP or wireless router.

For setup further configuration, please check user's manual on the software CD.
